✳ Bluetooth connected

1. GETTING STARTED

› **Inserting a SIM card**

- Lift off the battery cover – begin with the recess at the bottom left corner of the cover.
- Slide the SIM card into the SIM card holder with the gold contacts facing down.
- Slide your data card into the card holder with the gold contacts facing down.

› **Inserting and charging the battery**
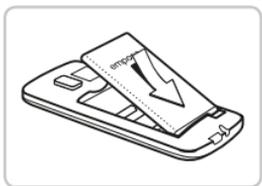

- Insert the battery, making sure that the battery contacts touch the phone's gold contacts.
- Put on the battery cover – press the battery cover down onto the phone until it clicks into place on each side.
- Plug the charging cable into the USB port on the bottom of the phone.

⚠ *Attention: Charge the battery for at least four hours before you use it for the first time. Only use batteries and chargers that are permitted for use with this specific model.*

❯ Turning on the phone
- Pressing the 🔚 key for at least two seconds switches the phone on.
- To turn the phone off, press the 🔚 key for two seconds again.

❯ Using a new SIM card for the first time:
Enter the four-digit PIN code (personal identification number)
⇨ Press the left function key for **OK** to confirm.

ℹ *The PIN code is a four-digit number that is intended to prevent somebody else from being able to switch on your mobile phone. You have a maximum of three attempts to enter the correct number. If you enter the wrong number three times in a row, you will only be able to unblock the SIM card with the PUK code. You will find the PIN code and PUK code in the documents supplied by your network operator.*

❯ Setting the language, time and date
Menu ⇨ **Settings** ⇨ **Phone settings** ⇨ **Time & date** or
Language ⇨ Change the selection in the list with the navigation
ring ⇨ Confirm the entry with the left function key for **OK**.

2. USING THE PHONE

In standby mode the phone is on, but is not running any applications (calls, SMS messages, etc.).

› **Menu items: File manager, Contacts, Call center, Messages, Multimedia, Tools, Settings, Sound & alert, SIM services**

› **Using the menu**
   - Press ▬ to open the menu.
   - Navigate through the menu items with the navigation ring.
   - Press the middle ■ function key to open the selected menu item.
   - Options which you can select with the function keys are shown at the bottom of the screen.
   - To return to standby mode, press the red 🔟 key.

› **Saving energy**
   If a few seconds pass without the phone receiving any input from you, the screen will go blank to save energy. In the event of an incoming call or you pressing any key, the screen will automatically light up again.

> **Dual-function keys**

Some keys have additional functions if they are pressed and held down for a few seconds:

$\boxed{1_\infty}$ key: Listen to your voicemail (settings in menu ⇨ **Call center** ⇨ **Call settings** ⇨ **Call forward**)

$\boxed{*+a}$ key: + for country code, e.g. +49 for Germany

$\boxed{O}$ key: Torch on continuously when the phone is on

$\boxed{\#*^1}$ key: Silent mode on / off

$\boxed{}$ key: Switch phone on / off

Number keys 2-9: Speed dial (save in **Contacts** ⇨ **Options** ⇨ **Phone book settings** ⇨ **Speed dial**)

3. CALLS

› **Incoming call**

   Accept the call with the green 🔽 key or reject with the red 🔴 key

› **Connecting:**
   - Dialling: Enter the number you want to dial using the keypad.
   - Open contact: Press the right function key for **Name** in standby mode and select a contact.
   - Redialling: Press the green 🔽 key in standby mode and open **All calls** and then select the contact in the list.

   ⇨ Start the call with the green 🔽 key and end it with the red 🔴 key.

› **During a call:**

   Call up **Options** with the left function key:
   Hold single call, **End single call**, **New call**, **Phonebook**, **Call info**, **Messages**, **Background sound**, **DTMF**

   ⇨ Change between **Speaker on** and **Speaker off** with the middle function key.

   ⇨ Change between **Mute** and **Unmute** with the right function key.

4. CONTACTS

› **Saving contacts (name and number)**
Open the menu with ▬ ⇨ **Contacts** ⇨ **Add contact**
⇨ Enter the name and number
⇨ Set the caller picture
⇨ Save the entry with **Options** ⇨ **Save**.

ⓘ *Always save names and numbers with the international dialling code, e.g. save +41 for Switzerland, +43 for Austria and +49 for Germany.*

› **Searching for contacts:**
Open the menu with ▬ ⇨ **Contacts**
⇨ Flick through the entries with the navigation ring or enter the first few letters of the entry you're looking for with the keypad.
⇨ When you have selected the entry, start the call with the green ▭ key.

5. CALL CENTER

> **Call info**
> **Menu items: Missed calls**, **Dialled numbers**, **Received calls**,
> **Delete, Call duration**, **Text msg. counter**

> **Call settings**
> **Menu items**: **Call waiting**, **Call forward**, **Call barring**,
> **Suppress number**, **Advanced settings**

> **Enabling the mailbox:**
> Open the menu with ▬ ⇨ **Call center** ⇨ **Call settings**
> ⇨ **Call forward**: Define which calls are to be diverted to the
> mailbox.

> **Listening to and setting your mailbox**
> Press [1.] for about three seconds. This connects you to your mailbox
> and you can listen to your voicemail.
> Follow the audio instructions to change the settings for your
> mailbox.

6. SMS MESSAGES

› Menu items: **Write message, Received, Drafts, Unsent, Sent, Delete messages, Broadcast message, Templates, Message settings**

› **Writing a message**
Open the menu with ▬ ⇨ **Messages** ⇨ **Write message**
Enter text using the keypad.

› **Writing using predictive text**
Predictive text has been activated on your phone at the factory.
- Press the number key displaying the letter you require once (e.g. $\boxed{4_{\text{ghi}}}$ for **i**).
- Once you've pressed several keys, words will automatically be suggested.
- One word will be highlighted in blue. If this is the word you require, you can insert it simply by pressing $\boxed{0_-}$, which is also used to insert blank spaces.
- If the word you require is not highlighted, you can use the navigation ring to move between the suggested words. When the word you require is highlighted, confirm your selection with $\boxed{0_-}$.

› Writing without predictive text

If you don't want to use predictive text, turn it off in the menu
**Messages ⇨ Write message ⇨ Options ⇨ Input method
options ⇨ Predictive text input**. To enter text without
predictive text, press the respective number key the required
number of times for the letter you need
(e.g. 2x 4ghi, 1x 2abc, 3x 5jkl, 3x 5jkl, 3x 6mno for Hallo).
The symbols available vary according to which language you are
using.

› Sending a message

Options ⇨ Send to ⇨ Enter a number or open contacts with
Add from Phonebook.

› Receiving a message

Received messages are indicated by an audio signal and
the ✉ symbol.

  • Open immediately with the left function key for **View**.
  • To view your message list, select **Messages ⇨ Received**.

7. MULTIMEDIA

› **Menu items: Camera, Photo album, FM radio**

Your phone has a camera. You will find
photos you have taken in the menu under **Photo album**.

› **Camera**
   • Take a photo with the middle function key.
   • Open the camera **Options** with the left function key.

› **Photo album**
   Your photos will be saved in the **Photo album** menu.
   • Open the **Options** for the selected photo with the left function key.

▐▶ *You can connect your phone to a PC using the USB data cable and transfer your photos.*

▐▶ *You can use a data card to increase the storage capacity of your phone. You can purchase these cards from electronics stores.*

› FM radio

Always use the headset to listen to the radio.

- Adjust volume: with the ⁎⁺ᵃ und #⁎ᵗ keys
- Switch radio on/off: press bottom side of the navigation ring
- Change frequency: with the left and right sides of the navigation ring
- Auto station search: switch on/off with the top side of the navigation ring, start search with the left or right side
- Open **Options** with the left function key
  Menu items: **Channel list**, **Manual input**, **Auto search**, **Settings**

8. TOOLS

› **Menu items: Alarm clock, Calendar, Tasks, Notes, Calculator, Favorites**

› **Alarm clock**
  - **Setting the alarm clock**
    A maximum of five alarm times can be saved.
    Press **Edit**, select the following settings and then save:
  - **Status**: Switch the alarm clock **on** or **off**
  - **Time**: Enter the alarm time with the keypad
  - **Repeat**: Select between **Once**, **Everyday** or **Custom**
  - **Alarm tone**: Select the alarm tone
  - **Snooze**: Set the length of the snooze function
  - **Alert type**: Select between **Ring only**, **Vib. only** and **Vib. and ring**

  - **Ringing alarm**
  - Turning off the ringing alarm: Press the left function key for **Stop**
  - Muting the alarm: Press the right function key for **Snooze**, the alarm will ring again later after the set time.

9. SETTINGS

› Menu items: **Phone settings, Network settings, Security settings, Connectivity, Master reset**

9.1 Phone settings – Navigation ring

Assign four functions you use most to this key.

9.2 Security settings

- **PIN**: PIN request on/off, change PIN
- **Phone code**: on/off, change (factory preset code: 1234)
- **Automatic key lock**

  Set the duration of the automatic key lock.
- **Manual key lock**

  Press the left ▬ function key for **Menu** and then the ✱⁺ꜛ key for Seconds. Keypad locked appears on the screen. The 🔒 symbol on the screen then shows that the keypad is locked.
- **Unlocking the key lock**

  Press the left function key for **Unlock** and then the ✱⁺ꜛ key. **Keypad unlocked** appears on the screen. The phone then responds to every press of a key again.

9.3 Connectivity – Bluetooth

This function allows you to use Bluetooth-enabled hands-free kits
wirelessly.

• **Bluetooth on/off**

• **Visibility ⇨ On**

Make your phone visible so that
it can connect to a Bluetooth device.

• **Connect ⇨ Search for new devices**

Search for devices you want to connect

⇨ Select with the green ⌒ key.

Devices that have been connected before will be recognised and
connected automatically.

9.4 Master reset

You can restore all the factory settings on your phone
(factory preset code: 1234).

10. SOUND & ALERT

Select Preferences (Profiles: General, Silent, Meeting, Outdoor,
My style) and enter your personal settings for sounds,
signals and vibration.

11. GUARANTEE AND SERVICE

› Safety information

- Turn off the phone in hospitals and whenever you are near medical equipment. There should always be a distance of at least 20cm between pacemakers and the phone when it is on.
- Never try to control a vehicle while holding the phone in your hand. Always comply with relevant national laws and traffic regulations.
- Turn off the phone whenever you are travelling in an aeroplane.
- The phone must be switched off whenever it is near a petrol station or other places with explosive substances.
- Never shine the LED torch in the eyes of people or animals! (Protection class 3)
- To prevent hearing impairments, do not use the phone on a high speaker volume for extended periods of time. Do not hold the phone to your ear when the hands-free mode is activated or the emergency button has been pressed.
- Using a headset on a high volume can cause hearing impairments. Check the volume of the headset you are using.
- The phone and the accessories may contain small parts. Keep the phone out of the reach of young children.
- As a precaution, we recommend disconnecting the phone from the charger during thunderstorms.
- The mains adapter serves as a separator between the product and your mains supply. The mains supply must be close to the device and easily accessible.

› Guarantee

- This guarantee is only valid if the original batteries supplied
  by emporia have been used.
- Mobile phone: 24 months
- Battery: 6 months

› Support

- **Emporia Service Centre**
  Industriezeile 36 · 4020 Linz · Austria · www.emporia.eu
- **Germany:** +49 · (0) 800 · 400 4711
- **Austria:** +43 · (0) 732 · 77 77 17 · 446
- **Switzerland:** +41 · (0) 8484 · 50004

› Intended use

- This phone is robust and designed for mobile use.
  However, it still needs to be protected from moisture (rain, bathroom water, etc.)
  and heavy impacts.
- Do not leave it where it will be directly exposed to the sun.
- Using the phone for any purpose other than that described above will result in
  damage to the product. Doing this also entails hazards such as fire, electric shocks,
  etc. This product must not be changed or modified, and the casing must not be
  opened.
- The adapter is only suitable for use in conjunction with a standard household
  mains socket that is connected to your electrical grid and uses 100-
  240 volts/50/60Hz (10/16A) of alternating voltage.

› Scope of delivery

- Mobile phone
- Battery: Li-ion 3.7V / 950mAh
- USB cable with USB AC adapter

› Technical data

- GSM 900/1800 MHz
- Dimensions: 124.5 mm x 52.5 mm x 12.5 mm
- Weight: 92 g
- Battery: Li-ion 3.7V/950mAh (replaceable)
- Internal antenna: SAR 0.92 W/kg (body), 0.1 W/kg (head)
- Standby time: 320 hrs*
- Talk time: 300 min * (* Depending on network coverage and activated applications the battery life can be reduced.)

› Disposal

- Disposing of the packaging
  The packaging and packaging aids are recyclable and should be made available for reuse.

- Disposing of the battery
  Batteries should never be disposed of as domestic refuse!
  As a consumer you are legally required to return used batteries.
  They can be handed in at one of your community's local collection points or at specialised stores.

- Disposing of the device
  If this product ever wears out, please don't dispose of it as domestic refuse.
  To ensure you don't cause damage to the environment, take it to a collection station or recycling centre where used devices are processed for recycling in an environmentally friendly manner.

12. DECLARATION OF CONFORMITY (DOC)
