1. GETTING STARTED

› **Inserting a SIM card**
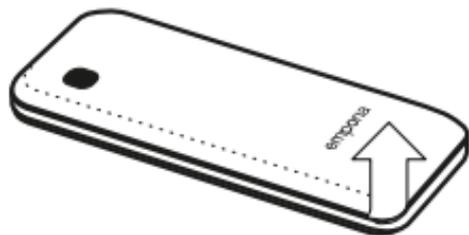

Lift off the battery cover – start with the recess at the bottom left corner of the battery cover.
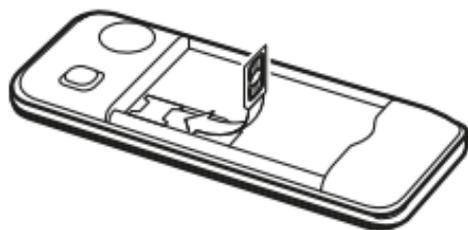

Slide the SIM card into the SIM card holder with the gold contacts facing down.

Slide your data card into the card holder with the gold contacts facing down. Press the locking tab down to remove the SIM card or data card.

❯ Inserting and charging the battery

- Insert the battery, making sure that the battery contacts touch the phone's gold contacts.
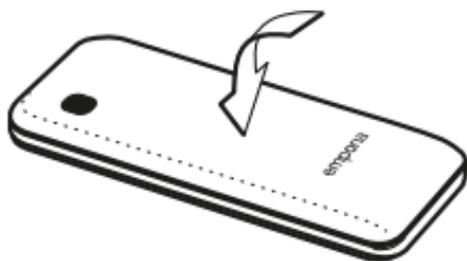

- Put on the battery cover – press the battery cover down onto the phone until it clicks into place on each side.
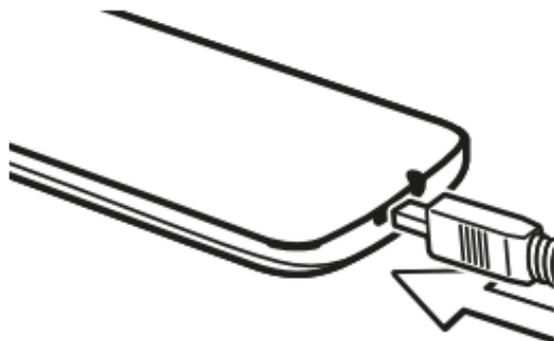

- Plug the charging cable into the USB port on the top of the phone.

🛈 *Attention: Charge the battery for at least four hours before you use it for the first time. Only use batteries and chargers that are permitted for use with this specific model.*

› Turning on the phone

- Pressing the 🔘 key for at least two seconds switches the phone on.
- To turn the phone off, press the 🔘 key for two seconds again.

› Using a new SIM card for the first time: Enter the four-digit PIN code (personal identification number) ⇨ Press the left function key for **OK** to confirm.

⓵ *The PIN code is a four-digit number that is intended to prevent somebody else from being able to switch on your mobile phone. You have a maximum of three attempts to enter the correct number. If you enter the wrong number three times in a row, you will only be able to unblock the SIM card with the PUK code. You will find the PIN code and PUK code in the documents supplied by your network operator.*

2. USING THE PHONE

After starting, the phone is in standby mode.

In standby mode the phone is on, but is not running any applications (calls, SMS messages, etc.). One of three menu pages is displayed.

› **Menu items: Contacts, Camera, WhatsApp, SMS/MMS, History, Browser, Calendar, Gallery, Radio, Clock, Settings, Google Video, Music, Cleaner, Tools, App Folder**

› **Unlocking the phone:**
Press the ✱+a key for at least two sec. to unlock the screen.
Changing the screen lock: **Settings ⇨ Security ⇨ Screen lock**

› **Using the menu**
· Press ▬ to toggle between the main menu pages.
Three dots at the bottom edge of the screen show the menu page you are viewing.
· Navigate through the menu items with the ⊡.
The selection is highlighted with a white border.
· Press the selection key ■ to open the selected menu item.
· Options which you can select with the function keys are shown at the bottom of the screen.
· To return to the main menu, press the red ☎ key.

› **Saving energy**
  If a few seconds pass without the phone receiving any input from you, the screen will go blank to save energy. In the event of an incoming call or you pressing any key, the screen will automatically light up again.

• Change the duration before switching to Phone idle:
  Settings ⇨ **Display** ⇨ **Phone idle**

› **Dual-function keys**
  Some keys have additional functions if they are pressed and held down for a few seconds:

• 1_{∞} **key:** Listen to your voicemail
  Changing the voice mail settings:
  ⇨ **Options**
  ⇨ **Settings**
  ⇨ Name of provider
  ⇨ Voicemail or call forwarding

• $*_{+a}$ **key:** Unlock keypad

• $#_{*}$ **key:** Silent mode on/off

• **key:** Switch phone on/off

• **left function key:** Open message line

> **How to write text**
  Use the $\boxed{\#_{*}}$ key to toggle between numeric and text input (language).

- Pressing the number key multiple times displays a list of letters; upper case letters follow the lower case letters.

  g | h | i | G | **H** | I | 4

- To input text, press the a number key multiple times (e.g. 2x $\boxed{4_{ghi}}$, 1x $\boxed{2_{abc}}$, 3x $\boxed{5_{jkl}}$, 3x $\boxed{5_{jkl}}$, 3x $\boxed{6_{mno}}$ for Hallo)

- **Non-standard characters:**
  Press the $\boxed{*_{+a}}$ key to open the menu for non-standard characters,
  press $\boxed{\cdot}$ to select the navigation ring, and then ■ selection key to apply.

- The symbols available vary according to which language you are using.

> **Using the mouse pointer**
  Navigation in **WhatsApp** and in the **browser** relies on the mouse pointer and the ■ selection key:

- Use the $\boxed{\cdot}$ navigation ring to move the mouse pointer (cursor) to the position you want to click

- Now press the ■ selection key

- Use ▭ left function key to change from an arrow display to a scroll display in mouse mode

- Press ▭ right-hand function key to go back

3. CALLS

> **Incoming call**
- Accept the call with the 📞 key or reject it with the 🔴 key
- Press the ⬛ selection key to reject the call and send a text message in response

> **Connecting:**
- **Dialling:** Enter the number you want to dial using the keypad
- **Open contact:** Open **Contacts** in the main menu, select the desired contact from the list
- **Redialling:** Open **History** in the main menu, select the contact from the list

  ⇨ Start the call with the 📞 key and end it with the 🔴 key.

> **During a call:**
  Use the left function key to open the **Options**:
  Loudspeaker/Headset earpiece, **Mute/Unmute**, **Hold/Resume**, **Add call**, **Send message**

- Use the ✛ navigation ring to change the in-call volume
- Press the ▬ right-hand function key to end the call

4. CONTACTS

› **Saving contacts (name and number)**
Open **Contacts** in the main menu

⇨ Press the ▭ left function key to open the **Options**
⇨ Press the ■ selection key to open **Add contact**
⇨ Select the storage location for the contact
⇨ Enter the name and number; press the #⁕ key to toggle between numeric and text input
⇨ **Options** ⇨ **Save**

❗ *Always save names and numbers with the international dialling code, e.g. +41 for Switzerland, +43 for Austria and +49 for Germany.*

› **Searching for contacts:**
In the main menu open Contacts
⇨ Use the ⊕ navigation ring to browse the entries, or use the keypad to type the first letter of the entry you are looking for in the search box.
⇨ The selected contact is highlighted in blue
⇨ Press the ☎ key to start the call
⇨ Press the ■ selection key to open the contact

5. CAMERA

› **Taking a photo or filming**
Open **Camera** in the main menu

⇨ The camera mode currently used
(photo ⓞ or video ⊙) is shown at the
centre.

- Use the selection key to take a photo or start/stop a video recording
- Use the ⊕ navigation ring to change to photo or video camera or gallery ⊛
- Depending on the mode, you can select camera settings ☰ or flash settings ⚡

6. WHATSAPP

Open **WhatsApp** in the main menu

› **Navigation**
Navigation in WhatsApp relies on the
mouse pointer and the ■ selection key:
See Section 2 »Using the phone«

› **Setting up WhatsApp**
You need to set up WhatsApp before you
can use it for the first time:

- Enter your own phone number
- WhatsApp sends a text message to verify the input
- Enter a user name of your own choice

❗ *In WhatsApp only contacts that you have
saved in Contacts and that are additionally
registered with WhatsApp are displayed.*

7. SMS/MMS

› **Receiving a WhatsApp message**
A new message is indicated by the
Ⓢ WhatsApp icon in the message bar, and
by a red circle ❶ in the menu field.

› **Opening a message**
Open **SMS/MMS** in the main menu

- Use the ⊞ navigation ring to select an
  entry from the message list, and press the
  ▮ selection key to open it
- Press the left function key to open
  the **Options**:
  New message, **Settings**, **Delete thread**,
  Cell Broadcasts, **Messages in SIM**

› **Composing a new message**
Open **SMS/MMS** in the main menu
⇨ **Options** ⇨ **New message**

- Use the keypad to enter text, press the
  $\boxed{\#\ast}$ key to toggle between numeric and
  text input

- **Entering the recipient:**
  Type the first letter to search for the
  contact, or press ⌕ to go to Contacts
- **Entering text:**
  See Section 2 »Using the phone«
- **Sending a message:**
  Press the left function key to open
  the **Options** ⇨ press the ∎ selection key
  to select **Send**

› **Receiving a message**
An incoming text message is indicated
by an acoustic signal, a sign in the lock
screen and a red circle marker ❶ in the
menu field. The unread message is
highlighted in blue in the list of messages.

8. CALL HISTORY

> **Opening call history**
> Open **History** in the main menu

- Menu items: **All**, **missed**, **outgoing**, **incoming**
- Press the 🔅 navigation ring to select the list, and select an entry in the list
- The selected contact is highlighted in blue
- Press the green 📞 key to start the call
- A missed call is indicated by a red circle marker ❶ in the menu field.

> **Viewing call details**
- Use the 🔅 navigation ring to change to the clock icon
- Press the ■ selection key to view details such as the call duration and call time
- **Options: Add to contacts, remove from call log, edit number before call**

> **Deleting calls**
> Use Options to delete a call or the whole list

9. BROWSER

Open **Browser** in the main menu

› **Navigation**
Navigation in WhatsApp relies on the mouse pointer and the ■ selection key:
See Section 2 »Using the phone«

10. CALENDAR

Open **Calendar** in the main menu

› **Open the day view**
· Use the ⊕ navigation ring to browse the calendar, press the ✱ key and # key to change months
· Use **Option ⇨ View** to view the appointments for the selected day

11. GALLERY

Photos are grouped in albums if they come from the same source. This means there is one album for camera photos, and another for WhatsApp photos, etc.

› **Viewing a photo or video**
Open **Gallery** in the main menu

- Press the ■ selection key to open the album; use the ⊕ navigation ring to switch between images
- Press the ■ selection key to display an image
- **Options**: **Share**, **Delete**, **Slideshow**, **Rotate left**, **Rotate right**, **Set picture as wallpaper/WhatsApp profile image**, **Details**

❶ *You can connect your phone to a PC using the USB data cable and transfer your photos. After establishing the USB connection, activate* **Connect as media device**.
You can use a data card to increase the storage capacity of your mobile phone. You can purchase these cards from electronics stores.

12. RADIO

› **Using the radio**
   Open **Radio** in the main menu

• **Options**: **Auto search**, **Radio list**,
   Headphones, **Start recording**,
   Recording file list
• **Adjusting the volume:**
   Use the ⊕ navigation ring up, down
• **Turning the radio on and off:**
   Press the ■ selection key

› Searching for a radio station
• **Selecting a frequency:**
   Use the ⊕ navigation ring left, right
• **Automatic station search**
   Options ⇨ **Auto Search**
• **Selecting a station from the list:**
   Options ⇨ **Radio list**

› **Recording the radio signal**
• **Recording:**
   While the radio station is broadcasting
   press **Options** ⇨ **Start recording**
• **Stopping recording:**
   Press the ■ selection key
• **Playing back a recording:**
   Options ⇨ **Recording file list** ⇨ Select
   detail and press the ■ selection key

13. ALARM CLOCK

Open **Clock** in the main menu

- Menu items: **Alarm**, **World Time**, **Timer**, **Stopwatch**

› **Setting the alarm clock**
 ⇨ Press the ⊕ navigation ring to select an entry from the list
 ⇨ The selected entry is highlighted in blue
 ⇨ Press the ■ selection key to open and edit the **Settings**

- Enable/disable wake-up time
- Enter a label
- Define the repeat behaviour: Every day, Workdays, Single
- Define the ringtone
- Enable/disable vibration
- Mute: Define duration
- Deleting

14. SETTINGS

> **Menu items**

- **Popular**
  Wi-Fi, **Bluetooth**, **Profiles**, **Display**, **Data usage**
- **User**
  Location, Security, Date & Time, Language and input, Scheduled power on and off, More
- **System**
  Storage, **Battery**, **Mouse control**, **Apps**, **Backup & Reset**, **About your phone**

14.1 Wi-Fi connectivity

To set up a Wi-Fi connection, you need the name of the Wi-Fi network and the matching password.

❶ *If you already have a Wi-Fi network at home, you can usually find this information on the underside of the Wi-Fi router.*

In the main menu, open **Settings**
⇨ **Wi-Fi**:

- The slider at the top of the screen is highlighted in blue
- Press the ■ selection key to switch on the Wi-Fi function on the device; the slider turns green

- Below it, a list of available Wi-Fi network is displayed
- Use the ⊕ navigation ring and ■ selection key to select the wireless network to connect to
- Type the password for the Wi-Fi network in the input field
- Select Connect
  - **Connected** appears under the name of the Wi-Fi network in the list of available networks.
  - Entering text: See chapter 2 »Use«

In the main menu, open **Settings** ⇨ **Bluetooth**:

- Use the slider to switch on the Bluetooth function on the device
- Make your phone visible so that it can connect to a Bluetooth device.
- Select the device you want to pair the phone with from the list
- Pairing in progress
- Confirm a connection that has been found

🔵 *Devices that have been paired before will be identified and automatically paired.*

14.3 Audio profiles
In the main menu, open **Settings**
⇨ **Profiles**

- Select one of the predefined audio profiles (**General**, **Mute**, **Vibration**, **Outdoor**)
- In the **General** profile you can edit settings for vibration, volume, ringtone, standard message tone, key dial tones, touch tones, screen lock sound
- Under **Option** you can create user defined audio profiles

14.4 Screen
In the main menu, open **Settings**
⇨ **Display**

Configure **Brightness**, **Wallpaper**, **Phone idle** and **Font size**

14.5 Data usage
In the main menu, open **Settings**
⇨ **Data usage**

- Selecting a network provider or Wi-Fi network
- Read off the data usage or switch mobile data on or off

14.6 Location
In the main menu, open **Settings**
⇨ **Location**

Use the slider to switch on the Location function on the device

❶ *Location detection can only be used in Battery saving mode*

14.7 Safety
In the main menu, open **Settings**
⇨ **Security**

To prevent your phone from being misused by other people, you can set a screen lock and a SIM card lock here. You can also specify how your phone will be protected when apps are installed.

14.8 Master reset
In the main menu, open **Settings**
⇨ **Backup & reset**

You can restore all the factory settings on your phone.

14.9 System update
In the main menu, open **Settings**
⇨ **About your phone** ⇨ **System update**

If an update for the device software exists, update notices are displayed. Select **Download**; once the download has been completed, select **Update now**.

15. INTERNET CONNECTIVITY

Opening an internet connection

- Long press on the ▬ left function key in the main menu
- Use the ⊕ navigation ring to change to **Switch**

❯ Internet connection with mobile data
Use the ⊕ navigation ring to select
⥮ **Data**, use the selection key to enable or disable mobile data on the device

❗ *If you use the mobile data connection, your network tariff must have a mobile data volume. Ask your dealer or your network provider for more information.*

❯ Internet connection with Wi-Fi
Use the ⊕ navigation ring to select
☎ **Wi-Fi**, use the selection key to enable or disable Wi-Fi on the device.

To use a Wi-Fi network, you need to open a connection once only (see section 4.1). After this, your phone identifies the Wi-Fi network and automatically opens the connection.

❗ *Wi-Fi is restricted to a specific location! If you leave the wireless range of the Wi-Fi network, the device will lose its internet connection.*

› Safety information

- Turn off the phone in hospitals and whenever you are near medical equipment. There should always be a distance of at least 20cm between pacemakers and the phone when it is on.
- Never try to control a vehicle while holding the phone in your hand. Always comply with relevant national laws and traffic regulations.
- Turn off the phone whenever you are travelling in an aeroplane.
- The phone must be switched off whenever it is near a petrol station or other places with explosive substances.
- Never shine the LED torch in the eyes of people or animals! (Protection class 3)
- To prevent hearing impairments, do not use phone on a high speaker volume for

extended periods of time. Do not hold the phone to your ear when the hands-free mode is activated or the emergency button has been pressed.

- Using a headset on a high volume can cause hearing impairments. Check the volume of the headset you are using.
- The phone and the accessories may contain small parts. Keep the phone out of the reach of young children.
- As a precaution, we recommend disconnecting the phone from the charger during thunderstorms.

- The mains adapter serves as a separator between the product and your mains supply. The mains supply must be close to the device and easily accessible.
- This device has been tested for typical applications where the device is carried on the body. To meet the RF exposure requirements, the minimum distance between the body, in particular the user's head, and the handset including antenna must be 0 cm. Belt clips, holsters and similar accessories from third parties used with this device must not contain metallic components.

Accessories carried on the body that do not meet these requirements may not meet the RF exposure requirements and should be avoided.
Use only the device's built-in antenna or an approved antenna.

- This device complies with the essential requirements and other relevant provisions of Directive 2014/53/EU.
All important radio test cases were carried out.
- Caution: Risk of explosion if the battery is replaced by the wrong type. Dispose of the used batteries according to the instructions.
- The device complies with RF specifications when the device is 5 mm from the body.

› Intended use

- This phone is robust and designed for mobile use. However, it still needs to be protected from moisture (rain, bathroom water, etc.) and heavy impacts.
- Only for European network standards (AT, BE, CZ, DE, DK, ES, FI, FR, GB, HR, HU, IE, IT, NL, NO, PL, PT, SE, SI, SK, SZ, TR).
- Do not leave it directly exposed to the sun.
- Using the phone for any purpose other than that described above will result in damage to the product. Doing this also entails hazards such as fire, electric shocks, etc. This product must not be changed or modified, and the casing must not be opened.
- The adapter is only suitable for use in conjunction with a standard household mains socket that is connected to your electrical grid and uses 100-240 volts, 50/60 Hz (10/16 A) of alternating voltage.

› Waste Management

• **Disposing of the packaging**
The packaging and packaging aids are recyclable and should be recycled.

• **Disposing of the battery**
Batteries should never be disposed of as domestic refuse! As a consumer you are legally required to return used batteries. They can be handed in at one of your community's local collection points or at specialised stores.

• **Disposing of the device**
If this product ever wears out, please don't dispose of it as domestic refuse. Be environmentally friendly! Take the device to a collection station or recycling centre where used devices are processed for recycling in an environmentally friendly manner.
