

# emporia

Make your smartphone  
easy app.

The **emporiaAPP** transforms any Android smartphone into a simple to use device.

Instant access to the most important functions.

Instead of countless applications you will find the most important functions such as telephone, camera or Internet at first glance and can start right away. Large text and colour coded icons help make the smartphone's user interface simple to navigate. The simple interface is also supported in various submenus.

## HOME SCREEN

The home screen provides immediate access to voice calls, text messages and gallery, whilst commonly used functions such as the weather, web browsing and a calculator are simply accessed with one swipe to the right.

## APPS SCREEN

The app screen shows the most used apps at a glance. If you go to "all apps", you can see the whole list, arranged in alphabetical order.

## PERSONAL SCREEN

Swipe left and a second home screen is accessible to access most used contacts, voicemail and emporia's famous emergency system.

The app operates perfectly with the following devices:

Samsung Galaxy S5  
Samsung Galaxy S6  
Samsung Galaxy S7  
Samsung Galaxy S7 edge  
Samsung Galaxy A3  
Samsung Galaxy Note8

**Easy is the new smart.**
